sdmay23-10: Prototyping and Testing Embedded Machine Learning in an Application
Week 4 Report
October 15 - October 21

Team Members

Jazz Jacobus — *Researcher*
Jose Carlos Garcia — *Researcher*
Benito Moeckly — *Researcher*
Caleb DeBoef — *Researcher*

Summary of Progress this Report

This week we did not meet with Dr. Rover, but we continued working on our Coursera machine learning course as well as our AWS training/machine learning course. We also completed the Design Contextualization and Exploration Design Document.

Pending Issues

Ordering DeepRacer, AWS Subscription, and possible supplies

Plans for Upcoming Reporting Period

• Continue Coursera Course on Embedded Machine Learning.
• Continue the AWS Training module on DeepRacer bot and AWS for storage.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Jazz Jacobus	Worked on Coursera Machine Learning Course and AWS Machine Learning course	3	
Jose Carlos Garcia	Worked on Coursera Machine Learning Course and AWS Machine Learning course	3	
Benito Moeckly	Worked on Coursera Machine Learning Course and AWS Machine Learning course	3	
Caleb DeBoef	Worked on Coursera Machine Learning Course and AWS Machine Learning course	3	0

Gitlab Activity Summary

Nothing to report.
